REPORT

OF THE

STATE INSPECTOR OF PUBLIC HIGH SCHOOLS

OF

NORTH CAROLINA

FOR THE

SCHOLASTIC YEAR ENDING JUNE 30, 1908

INCLUDING A

REPORT OF THE CITY AND TOWN HIGH SCHOOLS

BY

N. W. WALKER

PROFESSOR OF SECONDARY EDUCATION IN THE UNIVERSITY OF NORTH CAROLINA AND STATE INSPECTOR OF PUBLIC HIGH SCHOOLS

OFFICE OF THE STATE SUPERINTENDENT OF PUBLIC INSTRUCTION
RALEIGH, N. C., NOVEMBER, 1908

N813

NORTH CAROLINA
STATE LIBRARY

LETTER OF TRANSMITTAL.

CHAPEL HILL, N. C., October 24, 1908.

HONORABLE J. Y. JOYNER,

State Superintendent of Public Instruction,

Raleigh, N. C.

DEAR SIR:—I have the honor to submit herewith my First Annual Report of the Public High Schools, established under an act of the Legislature of 1907, for the scholastic year ending June 30, 1908.

I have included also, in accordance with your instructions, such a report of the city and town high schools as could be made from the reports sent in to your office by the principals of these schools. It is to be regretted that this part of my report is not complete. It was, however, impossible to make it so, since many of these schools failed to make to your office any report of their work.

Very truly yours, N. W. WALKER,

State Inspector of Public High Schools.

TABLE OF CONTENTS.

Letter of Transmittal.

Comments and Suggestions.

Table I—Public High Schools:
- Schools.

Summary V—City and Town High Schools.

General Summary VI.

General Summary VII.

REPORT OF THE STATE INSPECTOR OF PUBLIC HIGH SCHOOLS, 1907-1908.

COMMENTS AND SUGGESTIONS.

The establishment of a system of rural public high schools in North Carolina has come as a logical step forward in the advancement of popular education. The recent rapid development of our elementary schools has made the beginning of this system not only possible but imperative. The need of high school facilities for the boys and girls of our rural districts has long been evident, but no serious attempt to supply this need was made until 1907, when the Legislature passed our present high school law and provided an annual appropriation of fifty thousand dollars to stimulate high school instruction and teacher training. And thus the State has entered with seriousness of purpose the field of secondary education, and in so doing it has tried to meet an important duty and has assumed a solemn obligation.

During the first year of the operation of this law provision was made for the establishment of one hundred and fifty-six State high schools in eighty-one counties. One hundred and forty-five of these schools, in seventy-six counties, opened their doors the first year, and enrolled three thousand nine hundred and forty-nine students. This fact alone, I think, is an eloquent commentary upon the beginning that has been made, and a prophecy of no small significance. The indications are that during the current year we shall enroll in these schools between five thousand and six thousand high school students. It does not take a prophet to see that this system of schools, adequately provided for and properly directed, can be made to exert a tremendous influence in the development of the intellectual and industrial life of our State.

It may not be out of place to mention here some of the blessings and advantages that must come to our Commonwealth through these State high schools. And let us bear in mind that these results are neither hypothetical nor visionary: they are practical. They have been achieved in other States, and what has been accomplished elsewhere can be done here in North Carolina.

(1) These schools will offer to all children *equal opportunity for self-development*, which opportunity heretofore has been restricted to a limited few. They will thus be the means through which hundreds and thousands of bright boys and girls can be reached at that most important period of their life, the period of adolescence, and lifted to higher ideals of living and inspired to nobler service. Our rural life must be enriched, and enlarged, and spiritualized, and there can be no more effective agency for accomplishing these purposes than an adequate system of rural public high schools.

(2) Not only will these schools train thousands of children for more useful citizenship, but for the ambitious youth of slender means *they will open the doors of our higher institutions of learning* by bridging the chasm between the elementary school and the college, which heretofore has made higher training impossible to countless deserving young men and women. The State needs more trained leaders; the high school must find the boys and girls that have the ambition and the talent to become leaders, prepare them for higher training, and send them on to college.

(3) These schools will serve as a stimulus to the educational work of the counties and to the intellectual life of the communities in which they are located, and will thus help to *advance all our educational interests.* We cannot have an adequate system of elementary schools until we develop also a system of high schools. They will serve the elementary schools in two very important ways: (a) *By improving the teaching force in the lower schools.* With a good public high school in his county the superintendent can insist that all applicants for positions to teach in the lower schools shall be at least high school graduates. (b) The high school will prove to be *an incentive to the children to remain in school* until the course is completed, whereas the great majority of them now drop out before they get even the benefits to be derived from the elementary school. If ignorance is ever to be blotted out, the children must be got into school and kept there under competent teachers.

To all who are deeply interested in the progress of public education it is gratifying to know that the first year of the State high schools has been a most successful one. It is true that there have been some irregularities, some mistakes, some instruction given that was not of high school grade, but the work as a whole has gone forward steadily and hopefully. No institution was ever started on its career fully equipped and perfect. There are defects that have already appeared which must be corrected; there are adjustments to be made here and there, and they will be made; but all this was expected. School systems in their development are no exception to the law of growth; they can be perfected only through the slow process of evolution. And so it will be with the public high schools of North Carolina.

As at present organized the public high school is within comparatively easy reach of the majority of pupils of high school age. Thus the high school is a matter of personal interest to a majority of the people, and this popular interest is going to serve as a valuable asset in our work of the future. In starting this system we have proceeded along the line of least resistance, and I am confident we have made a proper beginning. A sure foundation has been laid upon which the structure of the future may be reared. Now, if we are to develop the type of high school that can be made of most service, we must begin to build along somewhat broader lines; we must take

steps at the earliest practicable moment to develop the strong central high school, one for each county, fully equipped, offering strong courses of study, and segregated, if necessary, from the elementary school. This central school, in every case, should be required to offer full four-year courses of instruction, in the classics, the sciences, and industry. I am confident that this type of school must come if the demands of the present and the future are to be met, and if the high school work is to possess the strength, and the dignity, and the importance that justly belong to it. And as these schools grow and extend their influence there must come in connection with each one the principal's home, the mess hall, and dormitory facilities. A few counties are now ready, it seems to me, to build the central high school, and I can see no reason why they should not be encouraged to do so.

The annual shifting of the high school principals from school to school is at present a serious handicap. The principal who feels that he has but a transient relation to the community life and that he has no other responsibility to meet than merely to perform his classroom duties from day to day, although he may do this faithfully and efficiently, is not going to develop the strong school that is demanded. He must become identified with the community and remain there long enough to impress his ideals upon its life and to give character and tone to the work of the school. There must be some permanent plan of organization for each school in order that the work from year to year may have continuity and be progressive, thus preventing great waste of educational effort and the loss of valuable time. In order to effect such a plan of organization and to give stable character to the work of his school the principal must become something more than a passing show; he must become a fixture for a few years at least.

The mess hall and the dormitory are adjuncts that must be provided very soon. Already hundreds of students from the adjoining districts and from distant parts of the counties are crowding into these public high schools, who must find board in the neighborhood of the schools. Of the students enrolled in the public high schools last year over five hundred were boarding students. The number this year will be decidedly larger, as the schools are better known and their influence stronger. The fact that there were so many boarding pupils the first year is a very encouraging sign. Except in a few cases no special effort has been made to provide cheap boarding facilities. In some cases board has been provided by local boarding-house keepers, in other cases the students have found good board in the homes of the community, and in a few instances they have formed clubs and secured board at cost. In one school I saw a club of about a dozen young women who rented rooms near the high school, brought their provisions from home, and did their own work. The principal told me that by following this plan those students did not have to

North Carolina State Library
Raleigh

pay out in money more than three dollars a month. Such a plan could be carried out by a considerable number of students in various schools if the dormitory and the mess hall could be provided. There is a great demand for these adjuncts, and provision should be made for them in as many as possible of the stronger schools.

Another matter that ought to be considered in planning for the central high school of the future is that of acquiring suitable lands for the purposes of agricultural and industrial instruction. When it is generally understood by the people of the rural districts that the State has taken up the work of secondary education with seriousness of purpose and that it intends to build for its youth such schools as the future may demand, then it will be an easy matter to secure by donation, without one cent of cost in most cases, at a very small expense in any case, sufficient lands for the purposes of the high school. It will be a very wise investment for any community to donate the land for the central high school to the county in order to secure the location of the school. The increasing demand for instruction in agriculture, domestic science, and manual training is bound to be met in some way, and in planning for the larger growth of the public high school this fact must be taken into consideration.

This, in brief, is the plan we must begin to work towards. We cannot accomplish everything at once, but if the proper encouragement is given, it will be a matter of only a few years before every county in the State can have and will have one strong central high school. But in recommending the central high school I would not be misunderstood; I do not advocate the discontinuance of the small high school, such as now exists in most of the counties. It will doubtless be necessary to discontinue many of the small schools, but it will be well if, in addition to the central school, each county, according to its wealth and size, can maintain from two to four small secondary schools conveniently located and offering about two years of the high school course. These small schools can be operated at small expense, and they will bring high school instruction within reach of a larger number of pupils who will not, for some years at any rate, attend the central school.

There are those who will say that it is a big undertaking for the State to operate such a system of schools as I have indicated, and I grant it. But we had as well acknowledge once for all that educating people is expensive, both in time and in money, but that it is infinitely more expensive to allow the children of the State to grow up in ignorance. We had as well acknowledge, too, and frankly admit that the business, above all others, that should concern a great State, jealous of its good name and mindful of its present and future welfare, is the education of its boys and girls. Particularly is this true in a democratic State, where equality of opportunity is the watchword of progress. It is true, because it is the kind and quality of their education, in the broad meaning of the term, that must determine a people's advancement, whether that advancement be in things industrial or in things spiritual.

SUMMARY I.—PUBLIC HIGH SCHOOLS.

SCHOOLS, TEACHERS, ENROLLMENT, ATTENDANCE.

SCHOOLS:

Total number of schools established	156
Number of schools that opened	145
Number of schools that postponed opening	11
Number of schools reporting fourth-year students	9
Number of schools reporting third-year students	50
Number of schools reporting second-year students	102

TEACHERS:

Number of teachers devoting their whole time to high school instruction	173
Number of teachers devoting only a part of their time to high school instruction	42
Total number of high school teachers	215
Number of male teachers	140
Number of female teachers	75
Number of male principals	132
Number of female principals	13

ENROLLMENT:

Number of boys enrolled	1,759
Number of girls enrolled	2,190
Total enrollment	3,949
Number of fourth-year students enrolled	70
Number of third-year students enrolled	297
Number of second-year students enrolled	861
Number of first-year students enrolled	2,721
Total enrollment	3,949

ATTENDANCE:

Average daily attendance, boys	1,283
Average daily attendance, girls	1,680
Total average daily attendance	2,963

SUMMARY II.—PUBLIC HIGH SCHOOLS.

SHOWING NUMBER OF STUDENTS PURSUING THE DIFFERENT BRANCHES.

NUMBER OF STUDENTS IN—

English Grammar	3,027
English Composition and Rhetoric	2,634
English Literature	1,968
Advanced Arithmetic	3,094
Algebra	2,814
Geometry	308
History of England	1,703
Ancient History	722
Mediæval and Modern History	378
American History	1,055
History of North Carolina	297
Latin	2,882
Greek	21
French	117
German	36
Physical Geography	1,318
Physics	264
Botany	46
Agriculture	377
Physiology	449
Introduction to Science	398
Commercial Geography	19

SUMMARY III.—PUBLIC HIGH SCHOOLS.

FUNDS—RECEIPTS AND DISBURSEMENTS.

RECEIPTS:

From local taxes	$ 27,470.48
From private donations	13,187.04
From county apportionments	21,943.66
From State appropriation	40,785.00
Total receipts	$103,386.18

DISBURSEMENTS:

For principals' salaries	$ 79,412.80
For salaries of assistant teachers	9,684.19
For incidental expenses	2,319.00
Total expenditures	$ 91,415.99
Balance on hand	11,970.19

SUMMARY IV.—HIGH SCHOOLS (TOWN AND CITY).

SCHOOLS, TEACHERS, ENROLLMENT, ATTENDANCE.

SCHOOLS:

Total number of schools reporting	45
Number of schools reporting fourth-year students	9
Number of schools reporting third-year students	33
Number of schools reporting second-year students	43

TEACHERS:

Total number of high school teachers	146
Number of teachers devoting their entire time to high school instruction	109
Number of teachers devoting a part of their time to high school instruction	37
Number of male teachers	60
Number of female teachers	86
Number of male principals	38
Number of female principals	7

ENROLLMENT:

Total enrollment	3,195
Number of boys enrolled	1,312
Number of girls enrolled	1,883
Number of fourth-year students enrolled	104
Number of third-year students enrolled	548
Number of second-year students enrolled	964
Number of first-year students enrolled	1,579

ATTENDANCE:

Total average daily attendance	2,553
Average daily attendance of boys	1,024
Average daily attendance of girls	1,529

SUMMARY V.—CITY AND TOWN HIGH SCHOOLS.

SHOWING THE NUMBER OF STUDENTS PURSUING THE DIFFERENT BRANCHES.

NUMBER OF STUDENTS IN—

English Grammar	2,099
English Composition and Rhetoric	2,128
English Literature	2,338
Advanced Arithmetic	1,984
Algebra	2,410
Geometry	529
History of England	1,031
Ancient History	881
Mediæval and Modern History	677
American History	617
History of North Carolina	122
Latin	2,519
Greek	4
French	101
German	113
Physical Geography	1,051
Physics	537

Physiology	224
Introduction to Science	44
Commercial Geography	5
Music	349
Manual Training	
Domestic Science	311
Business Course	38

SUMMARY VI.—GENERAL.

SHOWING THE TOTAL NUMBER OF HIGH SCHOOLS REPORTING (RURAL, CITY, AND TOWN), THE NUMBER OF TEACHERS, THE ENROLLMENT, AND ATTENDANCE.

	Rural.	City and Town.	Counted Twice.	Total.
SCHOOLS—				
Total number reporting	145	45	13	177
Schools reporting fourth-year students	9	9	1	17
Schools reporting third-year students	50	33	10	73
Schools reporting second-year students	102	43	19	132
TEACHERS—				
Total number of high school teachers	215	146	38	323
Number of teachers devoting their entire time to high school instruction	173	109	31	251
Number of teachers devoting only a part of their time to high school instruction	42	37	7	72
Number of male teachers	140	60	16	184
Number of female teachers	75	86	22	139
Number of male principals	132	38	10	160
Number female principals	13	7	3	17
ENROLLMENT—				
Total enrollment	3,949	3,195	746	6,398
Number of boys enrolled	1,759	1,312	283	2,786
Number of girls enrolled	2,190	1,883	462	3,611
Number of fourth-year students	70	104	3	171
Number of third-year students	297	548	111	734
Number of second-year students	861	964	250	1,575
Number of first-year students	2,721	1,579	382	3,918
ATTENDANCE—				
Total average daily attendance	2,963	2,553	580	4,936
Average daily attendance of boys	1,283	1,024	211	2,196
Average daily attendance of girls	1,680	1,529	369	2,840

SUMMARY VII.—RURAL, CITY AND TOWN HIGH SCHOOLS.

SHOWING THE TOTAL NUMBER OF STUDENTS PURSUING THE DIFFERENT BRANCHES IN THE RURAL, CITY, AND TOWN HIGH SCHOOLS.

	Rural.	City and Town.	Counted Twice.	Total.
STUDENTS IN—
